

Tender Specifications

ECLPARIPMVW

100W IP65 Variable White single source

LED PAR

1. General

1. The luminaire shall be a Variable-White PAR LED with DMX control of intensity and colour.
2. The luminaire shall be CE, UKCA, RCM, cTUVus, FCC compliant.
3. The luminaire shall comply with the USITT DMX-512, CRMX and ANSI RDM E 1.20 protocol standards.
4. The luminaire shall be capable of delivering a variable white output from 2'700 K to 6'500 K.
5. The luminaire shall be capable of delivering an extensive range of saturated and pastel colours.
6. The luminaire shall feature an LED source with a power of 100W.
7. The luminaire shall features an LED source containing 2 different colours of LED.
8. The luminaire shall not infringe any Intellectual Property unless licenced by the owner.

2. Physical

1. The luminaire shall be constructed from a combinations of rugged die cast aluminium, free of burrs and pits, and high quality thermo plastic all finished in black.
2. The following shall be provided:
 - a) Interchangeable lens fresnel with silicone shock mounts.
 - b) Sturdy integral die cast gel frame holders with two accessory slots, and a top mounted quick release gel frame retained.
3. The luminaire shall feature an integral frame holder including safety locks and top latch.
4. The luminaire shall features a secure locking mechanism knobs for tilt orientation.
5. The luminaires shall features on board mechanics for rigging to the ceiling.
6. The luminaire shall have a rugged black powder coat finishing.
 - a) Other powder coat colour options shall be available on request.
7. The luminaire shall feature integral power and electronics.
8. The luminaire shall weight no more than 4.1 kg.
9. The luminaire shall feature a passive cooling, fan-free system.

3. LED Emitters

1. The luminaire shall feature an Array Variable-White LED source designed and customized for Prolights.
2. The luminaire shall feature an LED source consisting only of LED emitters from a known production batch and bin.
3. The luminaires shall feature only LED emitters rated for nominal 50'000-hours LED life to L70.
4. The luminaire shall feature a minimum of three hours burn-In test during its manufacturing process.
5. The luminaire shall feature adjustable PWM frequency from 600Hz to 40'000 Hz.

4. Photometric documentation

1. The luminaire shall be supplied with a full and detailed photometric report measured by a calibrated two axis photogoniometer in a constant temperature environment and with the luminaire in a stabilised condition with not more than 0.5% variation in output over a 15 minute period.
2. The photometric report supplied with the luminaire shall detail CRI, CQS, TM-30 and spectral distribution at full output.
3. The photometric report supplied with the luminaire shall detail the spectral distribution of each constituent LED colour of LED source.
4. The photometric report supplied with the luminaire shall detail light level measured in lux and foot candles and beam diameter measured in meters and feet at 1 m, 2 m, 3 m 4 m, 5 m, 6 m, 7.5 m, 10 m, 15 m, 20 m, 25 m 30 m, 40 m distance with the luminaire at the following beam angle: 24 and 73 degrees.
5. The photometric report supplied with the fixture shall include ISO LUX and candela diagrams, showing light distribution in both X and Y planes measured with the luminaire mounted at height of 10 meters.

5. Photometric performance

1. The luminaire shall meet the following minimum photometric performance requirements which should be supported by the photometric documentation:
 - The luminaire shall have a CRI in excess of 97 with mounted 15° lens fresnel when set to a preset of 2'700 K.

- The luminaire shall have a CRI in excess of 96 with mounted 15° lens fresnel when set to a preset of 5'600 K.
- The luminaire shall have an output in excess of 4'570 lm with mounted 15° lens fresnel when set to Full On preset.

6. Calibration

1. The luminaire shall be factory calibrated during its production process.
2. The luminaire shall permanently store calibration data on internal PCB.
3. The luminaire shall feature replacement LED source calibrated using the same method as the standard.
4. Fixtures not offering LED calibration shall not be acceptable.

7. Electrical

1. The luminaire shall feature an internal auto sensing power supply with an input range from 100 V to 240 V AC 50/60 Hz protect by on board fuse.
2. The luminaire shall feature a nominal power consumption of 117 W.
3. The luminaire shall feature a Seetronic® PowerCON TRUE IP65 IN/OUT connectors.
4. The luminaire shall feature a Seetronic® 5 pin XLR connector for DMX input and DMX through.
5. The luminaire shall feature an on board OLED graphic display.
6. The luminaire shall be compatible with the USITT DMX-512A RDM protocol.
7. The luminaire shall support firmware upgrades using a dedicated UP-LOADER device using a 5 pin XLR connector.
8. The luminaire shall meet all requirements of the LVD (Low Voltage Directive) 2014/35EC and with the EMC (Electromagnetic Compatibility Directive) 2014/30/EU.

8. Optical

1. The light beam should have a 2-to-1 centre-to-edge drop-off ratio.
2. The units shall provide, but not be limited to:
 - a) 15, 30, 60 degree fixed angles fresnel lens.

9. Environmental

1. The luminaire shall feature IP 65 rating.
2. The luminaire shall be capable of operating in ambient temperature range of -20°C (-4°F) to +45°C (113°F).
3. Thermal management shall include LED circuit board temperature sensors.
4. Users shall permit monitoring of temperature sensor via legible black OLED multi-line display.
5. Fixtures that do not provide the active thermal monitoring of LED board, shall not be acceptable.

10. Control And User Interface

1. The luminaire shall feature a temperature sensor which shall be accessible in real time via RDM.
2. The luminaire shall be compatible with the ANSI RDM E 1,20 standard.
3. Fixtures not offering RDM compatibility features access or temperature monitoring via RDM shall not be acceptable.
4. The luminaire shall be equipped with multi-line OLED display for easy to read status reports and configurations changes.
5. The luminaire shall be equipped with four buttons user interface.
6. The luminaire shall offer additioanal use options to including:
 - a) Display time out option.
 - b) Standard color preset accessible via DMX on dedicated channel.
9. The luminaire shall offer stand alone functionally including:
 - a) 11 presets of whites.
 - b) Creation of white palette to be enabled in stand-alone.
 - c) Fixtures can be linked together with standard DMX cable and controlled from designated master fixture up to 32 units linked.
 - d) Fixtures in stand-alone state shall restore to the setting preset prior to power cycling.
10. Fixtures without stand-alone operation features described above shall not be acceptable.

11. Dimming

1. The luminaire shall feature continuous smooth and linear dimming of intensity from 0% to 100%.
2. The luminaire shall feature control of intensity in 8 bit or 16 bit mode.
3. LED control shall be compatible with broadcast equipment in the following ways:
 - a) PWM control of LED levels shall be imperceptible to video cameras and related equipment.
 - b) PWM rates shall be adjustable by the user at the fixture if necessary to avoid any visible interference on video camera and related equipment.
4. The luminaire shall feature a minimum of 4 options for dimming curves, selectable from the on board menu.
5. Dimming curves shall be optimized for smooth dimming over longer time fades.
6. The LED system shall be digitally driven using high-speed pulse width PWM modulation.

12. Accessories

The following accessories shall be included in fixture supplied:

1. 16 A 3G 2.5 mm Power cable with Seetronic IP65 PowerCON – BARE END.
2. 15° Lens fresnel.
3. Gel filter frame.

The following accessories shall be available as an optional:

1. 6 Units flight case, with 4 wheels and 8 handles to house 6 fixtures plus their accessories.
2. 30° and 60° Lens fresnel.
3. Round filter frame holder.
4. Asymmetric light diffusion 10°x20°, 10°x40°, 10°x60°, 30°x60°.
5. Full Snoot.
6. Barn door with 8 directional flaps.
7. Honeycomb louvre.

8. Concentric louvre.
9. 28mm spigot. M10 and M 12.
10. Up-loader Tool (UPBOX1) and it is Microsoft Software.

Approved device shall be the PROLIGHTS ECLPARIPMVW; no alternates or equals.
